

# **MULTI-JURISDICTIONAL MULTI-HAZARD MITIGATION PLAN WORKSHOP**

**January / February 2004**

# Purpose of Workshop

The purposes of this Workshop are to:

- Provide an overview of the planning process
- Present information regarding regional hazards associated risks
- Receive your feedback in order to develop specific mitigation goals, objectives, and action items for the Plan

*Please complete the survey and provide your comments.*

# **Disaster Mitigation Act of 2000**

# DMA 2000 Quick Facts

- Signed into law in October 2000 (PL 106-390)
- Paradigm shift from focus on response and recovery

# What Does DMA 2000 Include?

- New prerequisites for HMGP funding
  - Completion of Mitigation Plan
- Increased emphasis on state/local interaction as a framework for planning
- Plans must be approved by November 1, 2004 for HMGP and PDM eligibility
- There must be open public involvement in the formation of the plan

# What Does this Mitigation Planning Effort Include?

Natural and technological (man-made) hazards:

- Avalanche
- Coastal Erosion
- Coastal Storm
- Dam Failure
- Drought
- Earthquake
- Expansive Soils
- Extreme Heat
- Flood
- Hailstorm
- Hurricane
- Land Subsidence
- Landslide
- Severe Winter Storm
- Tornado
- Tsunami
- Volcano
- Wildfire
- Windstorm
- Man-made Hazards (various)

# Hazard Mitigation versus Emergency Operations Planning

- Hazard Mitigation Plan

*A pre-disaster, strategic plan written to guide how a community will lower its risk and exposure to disasters*

- Emergency Operations Plan (EOP)

*A response plan written to demonstrate how a community will respond in the wake of an emergency or a disaster*

# San Diego County

- Board of Supervisors/City Councils
  - Initiate, authorize and support the hazard mitigation planning process
  - Adopt the Hazard Mitigation Plan
- Unified Disaster Council
  - Policy Making
- Office of Emergency Services (OES)
  - Project management
  - Community liaison
  - Meeting coordination and facilitation
  - Active project support and involvement

# The Planning Process

# Mitigation Planning Process

# Organize Resources

## Local Participation

- County of San Diego and representatives from the region's 18 cities formed the Hazard Mitigation Working Group (HMWG)
- Public officials, fire chiefs/depts, police chiefs/depts, planners, private agencies, non-profit agencies, businesses, and the public provide input
- First Press Release – July 9, 2003

# **Local Participation** *(continued)*

## **Hazard Mitigation**

### **Workgroup Meeting Dates**

HMWG Meeting 1: 6/23/03

HMWG Meeting 2: 7/14/03

HMWG Meeting 3: 8/4/03

HMWG Meeting 4: 8/25/03

HMWG Meeting 5: 9/15/03

HMWG Meeting 6: 12/8/03

### **Public Meeting Dates**

Workshop 1: 1/22/04

Workshop 2: 1/27/04

Workshop 3: 1/28/04

Workshop 4: 1/29/04

Workshop 5: 2/4/04

# Mitigation Planning Process

# **Assess Risks**

## ***Identify & Profile Hazards***

# Hazard Identification, Analysis & Vulnerability Assessment

- Identify hazards that threaten the County
- Determine their probability of occurrence and what areas they can affect
- Identify community assets that may be affected
- Estimate the losses that may result from the hazard

# Regional Hazards Identified

1. Coastal Storm / Coastal Erosion / Tsunami
2. Dam Failure
3. Earthquake
4. Liquefaction
5. Fire (structural and wildfires)
6. Flood
7. Landslide (rain-induced)
8. Man-made Hazards (FOUO)

*Probability by geographic location was evaluated*

# Loss Estimation

- Loss is a function of the Structural, Content, and Use Value of an Asset
- Steps for Calculating Loss
  1. Calculate Values for Structural, Content, and Use of Asset
  2. Multiply Structural, Content, and Use Values x Percent Damage
  3. Total Loss = Sum of Structural, Content, and Use Losses
- HAZUS and other models were utilized to calculate loss associated with each Hazard

# Assets Inventory

# Mitigation Planning Process

# Developing the Mitigation Plan

# **Plan Development**

## ***Capabilities Assessment***

# Capabilities Assessment

- Process for identifying local governments' legal, administrative, fiscal, and technical capabilities
- Capabilities Assessment and Vulnerability Analysis provide direction for development of Plan Goals and Objectives

# Legal/Regulatory Capabilities

- Building Codes
- Zoning Ordinances
- Subdivision Ordinances
- Special Purpose Ordinances
- Growth Management Ordinances
- Site Plan Reviews
- General Plans
- Capital Improvement Plans
- Economic Development Plans
- Emergency Response Plans
- Real Estate Disclosure Plans

# Administrative & Technical Capabilities

- Planners and engineers with knowledge of land development and land management practices
- Engineers trained in construction practices related to building and infrastructure
- Planners and engineers with an understanding of natural or human-caused hazards
- Floodplain managers
- Surveyors
- Personnel with GIS or HAZUS skills
- Scientists familiar with hazards in the community

# Fiscal Capabilities

- Community Development Block Grants
- Capital Improvements Project Funding
- Authority to levy taxes for specific purposes
- Fees for water, sewer, gas, or electric services
- Impact fees for homebuyers or developers for new development
- Incur debt through general obligation bonds
- Withhold spending in hazard-prone areas

# **Develop a Mitigation Plan**

## ***Goals, Objectives & Actions***

# Goals & Objectives

## Goals

- General guidelines that explain what you want to achieve
- Broad statements with long-term perspectives
- Goals should reflect community's desire to protect people and structures and reduce costs of disaster response and recovery
- Goals should identify overall improvements you want to achieve
- *Sample Goal: Protect subdivisions from flooding*

# Goals & Objectives

## Objectives

- Defined strategies or implementation steps intended to attain the identified goals
- Objectives are specific, measurable, and have a defined horizon
- *Sample Objective: Reduce the number of structures in the 100-year flood plain*

# Process for Identifying Objectives

- Use goals as basis for objectives
- Objectives should be more specific than goals
- Provide details about how to accomplish each goal
- Get public input for both goals and objectives

# Example of Goals & Objectives

## Example of state goals and objectives:

North Carolina State Mitigation Goals (excerpted from the August 2001 state plan).

**Goal 1 Maintain and enhance the North Carolina Division of Emergency Management's capacity to continuously make North Carolina less vulnerable to hazards.**

- Objective 1.1 Institutionalize hazard mitigation.
- Objective 1.2 Improve organizational efficiency.
- Objective 1.3 Maximize utilization of best technology.

**Goal 2 Build and support local capacity and commitment to become continuously less vulnerable to hazards.**

- Objective 2.1 Increase awareness and knowledge of hazard mitigation principles and practice among local public officials.
- Objective 2.2 Provide direct technical assistance to local public officials and help communities obtain funding for mitigation planning and project activities.
- Objective 2.3 Encourage communities to develop, adopt, and implement local hazard mitigation plans.

**Goal 3 Improve coordination and communication with other relevant organizations.**

- Objective 3.1 Establish and maintain lasting partnerships.
- Objective 3.2 Streamline policies to eliminate conflicts and duplication of effort.
- Objective 3.3 Incorporate hazard mitigation into activities of other organizations.

**Goal 4 Increase public understanding, support, and demand for hazard mitigation.**

- Objective 4.1 Identify hazard-specific issues and needs.
- Objective 4.2 Heighten public awareness of natural hazards.
- Objective 4.3 Publicize and encourage the adoption of appropriate hazard mitigation actions.

# Identify & Prioritize Mitigation Measures

- Mitigation measures are actions that local jurisdictions can take to lessen hazard impacts
- Mitigation measures help achieve goals and objectives
- *Sample Mitigation Measures:*
  - Enhance the Open Space Brush Management program to ensure compliance with brush management requirements
  - Establish an urban/wild land fire technical working group in conjunction with County and State representatives

# Mitigation Planning Process

# **Implement Plan & Monitor Progress**

## ***Development Strategy***

# Prepare an Implementation Strategy

- An Implementation Strategy is a comprehensive description of how mitigation measures will be implemented
- The strategy should show how the mitigations measures will be implemented, who will implement them, and when they will be implemented

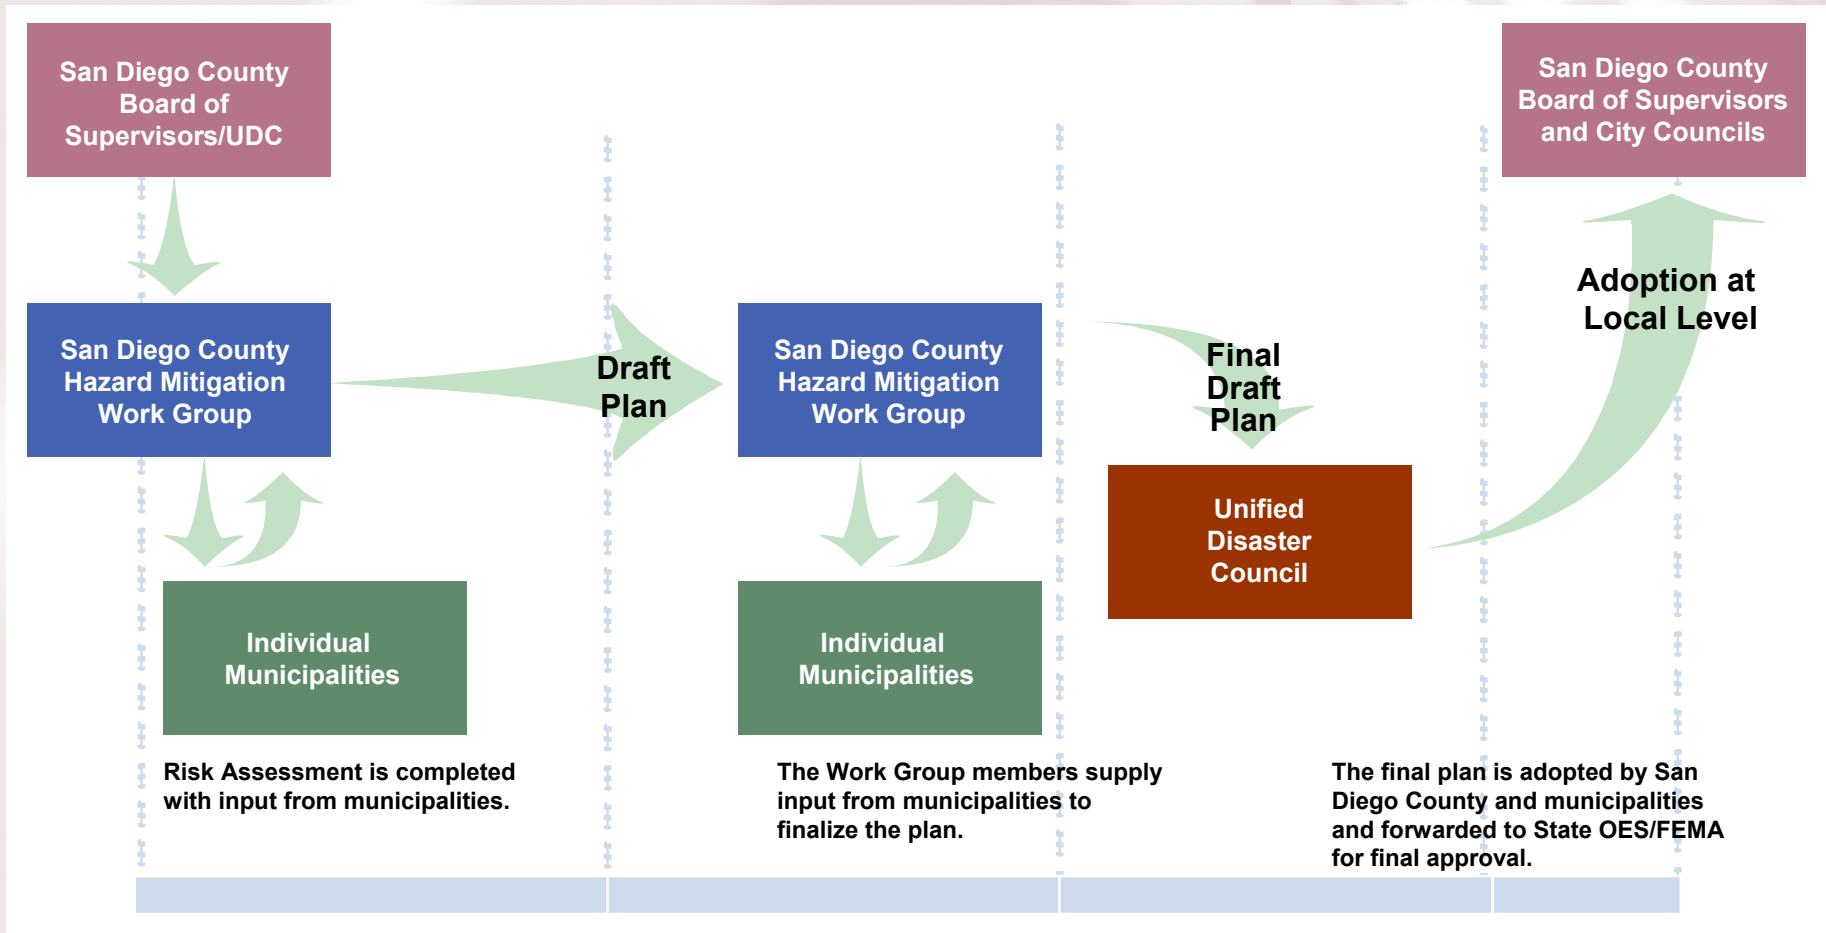

# **Plan Development**

## ***Review Process***

# Mitigation Planning Process

# Timeline

July 2003 – February 2004	Public outreach
January 2004	Input due from jurisdictions
February 2004	Draft plan distributed
March 2004	Final plan distributed
March – May 2004	Plan adopted by County & Cities
June 2004	Adopted plan submitted to FEMA

# Your Assignment

With your input, the Plan will prioritize mitigation measures with appropriate implementation strategies.

Please review the materials on display, ask questions, and complete the survey to provide your comments.
